GROUP IN FIGURES

Revenue

Our products are used in more than 100 000 construction projects each year

GOALS

Sustainable Development

We make sure that our raw materials come from sustainably managed source.

Employment & Economic Growth

We strive to grow communities and offer our people the opportunity for development.

We believe in fostering a strong sense of entrepreneurship and keeping a decentralized leadership. This allows for individual initiative that enables us to meet our customers needs and respond to market changes quickly and with flexibility.

Our people are experts in their field and can shape the way we do things.

Sustainable Production Consumption

Our continuous long-term goal is to be as efficient as possible. This applies both to business efficiency and our environmental impact.

By investing in our people, facilities and in the best technology available we ensure great working conditions for our workers and find new ways to make full use of the timber that we process.

This way we ensure minimal impact on the environment.

Climate Change

We want to take an active part in replacing the use of non-renewable raw materials with renewables wherever possible.

We believe that wood has a large part to play as an alternative to non-renewables, should be used wisely and with good stewardship.

Wood can be used in many applications where mostly non-renewable materials are used today.

SUSTAINABLE DEVELOPMENT GOALS

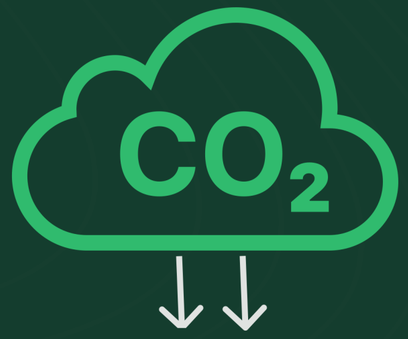

SUSTAINABLE DEVELOPMENT GOALS

GOALS

Carbon Footprint

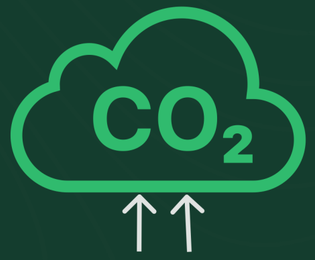

Preliminary Assessment in CO2 eq t

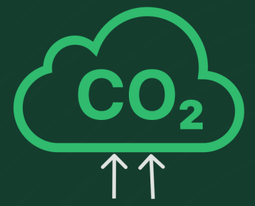

Our products store carbon

300 000t

Production

27 000t

Transportation

6 400t

* Including 41 783 MWh of electricity (conventional = 26 598 CO2 eq t)
and 138 988 MWh heat energy (from biomass = 36 CO2 eq t)

CERTIFICATIONS

Our Commitment to Quality and Reliability

SP Certification

Combiwood’s SP certification highlights our dedication to quality and safety, assuring customers that our wood products meet the strict Swedish industry standards, ensuring exceptional performance and reliability.

PEFC Certification

With PEFC certification, Combiwood demonstrates its commitment to promoting responsible forest management, guaranteeing that our wood products meet the highest environmental and ethical standards.

FSC Certification

Combiwood proudly holds FSC certification, ensuring that our wood products come from responsibly managed forests and contribute to a sustainable and eco-friendly future.

Thank you!
